

District of North Vancouver Council / Community Monitoring and Advisory Committee Workshop February 26, 2002

Time: 7:00-9:00 p.m

Location: Committee Room – District of North Vancouver
355 Queens Road

Objectives: Mutually discuss major issues that may require mitigation and be larger than those strictly attributable to GVRD projects; and

Consider the “sustainability issue” in terms of whatever changes in Capilano and Seymour communities that might take place

Note: *This workshop is taking place on the assumption that the GVRD Board endorses the GVRD draft staff recommendation for the expanded Seymour siting of the Capilano source filtration plant*

Agenda

1. Introduction and objectives
2. Overview of Seymour water utility projects
3. Identification of major issues that may require mitigation and be larger than those strictly attributable to GVRD projects
4. Discussion of potential approach for areas requiring multi-partner solutions
5. Discussion of sustainability of communities through and after major construction is complete, in terms of impacts the construction and operations may have
6. Other business
